

Assignment for a front-end developer

Create an interactive html/js/css from provided design.

You will be assigned to an InVision project and you will have to use "InVision Inspect" feature to develop a working prototype. You can find required assets in "InVision Inspect". The design contains 3 Desktop windows and 3 mobile windows with additional expanded burger-menu window.

Desktop

When clicking on (*Nike shoes, Shoes or Sports shoes*) you have to scroll down or up to appropriate part, Also when using mousewheel scroll you should scroll to elements with browser window hijack (*1 mouse scroll = automated scroll to the next or previous element.*)

Mobile

The Design should be responsive. When resizing to mobile, the same links (*Nike shoes, Shoes or Sports shoes*) should behave like tabs. Clicking on them should load appropriate content.
